September 18 at 1:30 looks to be the best first opportunity for us and the school district. Will this work for EPA/DNR teams?

Yes, it would be great to have IDNR and the School District on the call. (I think I have a habit of saying “the City,” when really I mean all related interested parties – including the School District, Police Dept. etc.- thank you for the clarification!) I have cc’d Amie Davidson and Alex Moon from IDNR, so they may be aware of meeting scheduling.

Looking forward to speaking with you – thanks again.

I'm sorry for the delayed response!

I appreciate the contact and I need to take a closer look at that sections you reference. I would like to set up a call; a couple of thoughts though.

- Including the school district would be important, so I'd like to offer the forum to them as well.

- Is the DNR an entity to include as well? At our forum a few weeks ago with DNR and EPA, it seemed that the two entities were talking independently on ways to reduce the costs.

I truly appreciate the offer for discussion and the continued work! I don't think we have retained anyone else yet, but I will check now and advise.

Rita,

As you know, EPA's Engineering Evaluation/Cost Analysis went on public notice last Thursday. I know Tonya has already provided the EE/CA to you, but I wanted to draw your attention to pages ES-4, 11-12, and 14-16, which discuss potential cost savings available for the work remaining on-Site. I think it would be helpful for the EPA and the City to discuss how certain site decisions could generate significant cost savings and make redevelopment easier. Tonya and I could also chat with you about potential resources that might be available through EPA to assist the City in its redevelopment planning for the Site. Would you have some time available later this week for a conference call? If the City has retained outside environmental counsel, it might be helpful for outside counsel to participate as well.

Thanks!

Hi Tonya, look forward to meeting in person. Take care in Texas, Mary!

> Rita and Kristen - Please note that I am looping in Tonya Howell on these communications. Tonya is our lead technical project manager for the site and will be starting to take over the larger redevelopment aspects of the project. Fortunately Tonya is also our site Reuse Coordinator so she brings some good background and experience to this project. I am currently in Dallas helping to support EPA's response to Hurricane Harvey and need to delegate my duties on Dico.
